#### Tips for Added Security:

- A. Choose a password that is not easily guessed. Do not use your GL number, your name, golf12, pmgc12, 123456 etc.
- B. Adding a couple of numbers and a Capital letter somewhere in the password creates much stronger password protection.
- C. Keep your password known only to yourself. If another player wants to include you in their group, they do NOT need your password, they only need your GL number.
